### GEO-FENCING

An intelligence-driven approach to physical security deployments is what separates NSA Protect from other security service providers. Real-time insights enabling informed and risk averse decision making:

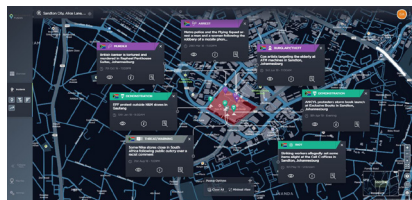

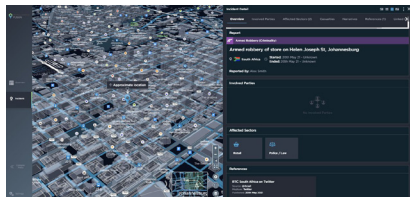

Insights into historical events enable NSA Protect to accurately define area-specific crime trends and hotspots of criminality, identify where threats and

issues are present, and in what volume;

### 24/7 incident analysis

in our GSOC allowing for real-time updates to be sent to our tactical teams in the field;

Static assets and locations can be geo-fenced to ensure that any incidents occurring within close proximity and that may disrupt or otherwise affect our clients, are flagged, analysed and disseminated to our tactical teams.
